**SECOND AMENDED COMPLAINT FOR PATENT INFRINGEMENT
AGAINST ZYDUS AND SANDOZ**

Plaintiffs Pharmacyclics LLC (“Pharmacyclics”) and Janssen Biotech, Inc. (“Janssen”), (collectively, “Plaintiffs”), by their undersigned attorneys, bring this action against Defendants Zydus Worldwide DMCC (“Zydus Worldwide”) and Cadila Healthcare Limited (“Cadila”) (collectively, “Zydus”) and Sandoz Inc. and Lek Pharmaceuticals d.d. (“Lek”) (collectively, “Sandoz”), and hereby allege as follows:

NATURE OF THE ACTION

1. This action for patent infringement, brought pursuant to the patent laws of the United States, 35 U.S.C. § 1, *et seq.*, arises from Zydus’s and Sandoz’s recent submissions to the United States Food and Drug Administration (“FDA”) of Abbreviated New Drug Applications (“ANDAs”) seeking approval to market generic versions of Plaintiffs’ highly successful pharmaceutical product IMBRUVICA[®], prior to the expiration of patents listed in the *Approved Drug Products with Therapeutic Equivalence Evaluations* (an FDA publication commonly known as the “Orange Book”) for IMBRUVICA[®]. Zydus has submitted ANDA No. 211344 (“Zydus’s ANDA”) which seeks approval to market a generic version of IMBRUVICA[®], prior to

the expiration of the U.S. Patent Nos. 8,008,309 (“the ’309 Patent”); 7,514,444 (“the ’444 Patent”); 8,697,711 (“the ’711 Patent”); 8,735,403 (“the ’403 Patent”); 8,957,079 (“the ’079 Patent”); 9,181,257 (“the ’257 Patent”); 8,754,091 (“the ’091 Patent”); 8,497,277 (“the ’277 Patent”); 8,952,015 (“the ’015 Patent”); 8,476,284 (“the ’284 Patent”); 8,754,090 (“the ’090 Patent”); 9,296,753 (“the ’753 Patent”); 9,725,455 (“the ’455 Patent”); 10,125,140 (“the ’140 Patent”); and 10,106,548 (“the ’548 Patent”). Sandoz has submitted ANDA No. 211267 (“Sandoz’s ANDA”) which seeks approval to market a generic version of IMBRUVICA[®], prior to the expiration of the ’753, ’455, ’140, and ’548 Patents; and U.S. Patent Nos. 9,713,617 (“the ’617 Patent”); 9,795,604 (“the ’604 Patent”); 10,294,231 (“the ’231 Patent”); and 10,294,232 (“the ’232 Patent”).

IMBRUVICA[®]

2. IMBRUVICA[®] (ibrutinib) is a ground-breaking drug which covalently binds to a protein called Bruton’s tyrosine kinase (“BTK”), thereby irreversibly inhibiting BTK’s activity.

3. BTK is a key signaling molecule in the pathway that leads to B-cell growth and maturation following activation of the B-cell receptor. Abnormalities in the B-cell receptor signaling pathway can lead to uncontrolled cell growth and cause cancers of the blood and bone marrow. IMBRUVICA[®] is the first FDA-approved BTK inhibitor.

4. Pharmacyclics invested hundreds of millions of dollars in the development of IMBRUVICA[®]. Pharmacyclics partnered with Janssen to bring this revolutionary drug to patients across the United States and throughout the world. Janssen, recognizing the potential of the compound, invested hundreds of millions of dollars in the clinical development and commercialization of IMBRUVICA[®].

5. Initial clinical trials using IMBRUVICA[®] to treat mantle cell lymphoma (“MCL”) showed that patients taking IMBRUVICA[®] had an observed response rate of 68%. These results led FDA to grant accelerated approval to IMBRUVICA[®] for the treatment of MCL in patients who had received at least one prior therapy through the new Breakthrough Therapy Designation pathway, a process that allows the FDA to grant priority review to drug candidates if preliminary clinical trials indicate that the therapy may offer substantial treatment advantages over existing options for patients with serious or life-threatening diseases. IMBRUVICA[®] was one of the first drugs ever to receive FDA approval via the Breakthrough Therapy Designation.

6. IMBRUVICA[®] has received three additional Breakthrough Therapy Designations for three additional indications: Waldenström’s macroglobulinemia; chronic lymphocytic leukemia (“CLL”) or small lymphocytic lymphoma (“SLL”) with a deletion of the short arm of chromosome 17 (del 17p); and chronic graft-versus-host-disease (“cGVHD”). IMBRUVICA[®] is also indicated for the treatment of marginal zone lymphoma (“MZL”) in patients who require systemic therapy and have received at least one prior anti-CD20-based therapy and the treatment of CLL/SLL. For MZL and cGVHD, IMBRUVICA[®] represents the first FDA approved treatment specifically for patients with these disorders.

7. IMBRUVICA[®] has one of the most robust clinical oncology development programs for a single molecule in the industry, with more than 130 ongoing clinical trials. There are approximately 30 ongoing company-sponsored trials, 14 of which are in Phase 3, and more than 100 investigator-sponsored trials and external collaborations that are active around the world.

8. IMBRUVICA[®] has gained widespread acceptance in the medical community with more than 135,000 patients around the world having been treated with IMBRUVICA[®]. In 2015,

IMBRUVICA[®] was awarded the prestigious Prix Galien Award for Best Pharmaceutical Agent. The Prix Galien Award is considered the biomedical industry's highest accolade.

9. The '309, '444, '711, '403, '079, '257, '091, '277, '015, '284, '090, '753, '455, '617, '604, '140, '548, '231, and '232 Patents are listed in the Orange Book for IMBRUVICA[®].

Zydus's First Notice Letter represented that Zydus Worldwide had submitted to FDA ANDA No. 211344 and a purported Paragraph IV certification for the '309, '444, '711, '403, '079, '257, '091, '277, '015, '284, '090, '753, and '455 Patents.

76. On January 16, 2018, in connection with the parties' negotiation over Zydus's Offer of Confidential Access, Plaintiffs requested the Drug Master File for the ibrutinib used in Zydus's ANDA Product. On January 26, 2018, Zydus stated it could not provide the requested Drug Master File. On February 7, 2018, Plaintiffs received Zydus's ANDA. On February 13, 2018, Plaintiffs requested additional information and renewed their request for the Drug Master File in order to fully evaluate Zydus's claims of non-infringement of the '455 and '753 Patents. On February 15, 2018, Zydus informed Plaintiffs it would not be producing the Drug Master File. To date, despite receiving numerous requests from Plaintiffs, Zydus has not produced the requested information.

77. According to applicable regulations, Notice Letters such as Zydus's must contain a detailed statement of the factual and legal basis for the applicant's opinion that the patent is invalid, unenforceable, or not infringed which includes a claim-by-claim analysis, describing "for each claim of a patent alleged not to be infringed, a full and detailed explanation of why the claim is not infringed" and "for each claim of a patent alleged to be invalid or unenforceable, a full and detailed explanation of the grounds supporting the allegation." *See* 21 CFR § 314.95(c)(7); *see also* 21 CFR § 314.52.

78. On information and belief, Zydus sent Pharmacyclics and Janssen a Second Notice Letter dated December 6, 2018. Zydus's Second Notice Letter represented that Zydus had

submitted to FDA ANDA No. 211344 and a purported Paragraph IV certification for the '140 and '548 Patents.

79. For at least one claim of each of the '309, '444, '711, '403, '079, '257, '091, '277, and '548 Patents, Zydus's First and Second Notice Letters failed to allege that its ANDA Product or the proposed administration of that Product would not meet the limitations of that claim.

80. On information and belief, if FDA approves Zydus's ANDA, Zydus will manufacture, offer for sale, or sell its ANDA Product, within the United States, including within the State of Delaware, or will import its ANDA Product into the United States, including the State of Delaware. The manufacture, use, offer for sale, sale, or importation of Zydus's ANDA Product will directly infringe the '309, '444, '711, '403, '079, '257, '091, '277, '015, '284, '090, '753, '455, '140, and '548 Patents either literally or under the doctrine of equivalents, and Zydus will actively induce and/or contribute to their infringement.

81. Plaintiffs initially brought this action within forty-five days of receipt of Zydus's First Notice Letter. Accordingly, Plaintiffs are entitled to a stay of FDA approval pursuant to 21 U.S.C. § 355(j)(5)(B)(iii) and U.S.C. § 355(j)(5)(F)(ii). The First Amended Complaint was brought within forty-five days of Plaintiffs' receipt of Zydus's Second Notice Letter.

82. On July 8, 2019, Plaintiffs requested Zydus's consent to file this Second Amended Complaint with counts for infringement against Sandoz of the '231 and '232 patents. On July 23, 2019, Zydus provided written consent to the filing of this Second Amended Complaint with counts of infringement against Sandoz of the '231 and '232 Patents.

83. This Second Amended Complaint is timely filed prior to the August 16, 2019 deadline for amended pleadings as set forth in the Scheduling Order. C.A. No. 18-192, D.I. 85 at 1.

SANDOZ'S ANDA NO. 211267

84. On information and belief, Sandoz has submitted ANDA No. 211267 to FDA, or caused ANDA No. 211267 to be submitted to FDA, under 21 U.S.C. § 355(j), in order to obtain approval to engage in the commercial manufacture, use, or sale of ibrutinib capsules as a purported generic version of IMBRUVICA® prior to the expiration of the '753, '455, '617, '604, '140, '548, '231, and '232 Patents.

85. On information and belief, FDA has not approved Sandoz's ANDA.

86. On information and belief, Sandoz sent Pharmacyclics a Notice Letter dated January 3, 2018. Sandoz's Notice Letter represented that Sandoz had submitted to FDA ANDA No. 211267 and a purported Paragraph IV certification for the '753, '455, '617, and '604 Patents.

87. In Sandoz's Notice Letter, Sandoz purported to offer confidential access to portions of its ANDA No. 211267 on terms and conditions set forth in Sandoz's Notice Letter ("the Sandoz Offer"). Sandoz requested that Pharmacyclics accept the Sandoz Offer before receiving access to ANDA No. 211267. The Sandoz Offer contained unreasonable restrictions on who could view the ANDA, well beyond those that would apply under a protective order. The Sandoz Offer did not permit any of Pharmacyclics' in-house attorneys to access ANDA No. 211267. Nor did it permit any scientific experts to access ANDA No. 211267. Nor did it permit outside counsel, in-house attorneys, or scientific experts for Plaintiff Janssen to access Sandoz's ANDA. Additionally, the Sandoz Offer contained provisions that unreasonably restricted the ability of counsel receiving access to ANDA No. 211267 to engage in any patent prosecution or work before or involving the FDA. The restrictions the Sandoz Offer placed on access to ANDA No. 211267 contravene 21 U.S.C. § 355(j)(5)(C)(i)(III), which states that an offer of confidential access "shall contain such restrictions as to persons entitled to access, and on the use and disposition of any information accessed, *as would apply had a protective order been entered for*

the purpose of protecting trade secrets and other confidential business information” (emphasis added).

88. Beginning with correspondence on January 16, 2018, outside counsel for Plaintiffs negotiated in good faith with counsel for Sandoz in an attempt to reach agreement on reasonable terms of confidential access to the ANDA. Sandoz continued to insist on unreasonable restrictions on access to the ANDA, which are inconsistent with the provisions of Protective Orders Sandoz has agree to in recent litigation involving similar subject matter. Sandoz refused to provide confidential access to its ANDA to Plaintiff Janssen. Plaintiffs explained that Janssen is the exclusive licensee of the asserted patents, and, as such, Janssen would be a plaintiff in any Hatch-Waxman litigation involving the asserted patents and would be included on any protective order/discovery confidentiality order entered in such a litigation. Nonetheless, until February 11, 2018, Sandoz categorically refused to allow Janssen any access to its ANDA and therefore to information that would be necessary to evaluate Sandoz’s ANDA and the representations in its Notice Letter. Additionally, even though Sandoz regularly agrees to permit at least two in-house attorneys from opposing parties in Hatch-Waxman to access its confidential information, Sandoz refused to do so here. *See, e.g., Forest Labs., LLC et al. v. Teva Pharmaceuticals USA, Inc. et al.*, 16-cv-1114, D.I. 83 (D. Del. Aug. 9, 2017); *Teva Pharmaceuticals USA, Inc. et al. v. Sandoz Inc.*, 17-cv-597, D.I. 49 (D. Del. Feb. 1, 2017); *AMAG Pharmaceuticals, Inc. v. Sandoz Inc.*, 16-cv-1508, D.I. 31 (D. Del. Jul. 29, 2016). Outside counsel for Janssen and Pharmacyclics, and one in-house representative for Pharmacyclics, received access to portions of Sandoz’s ANDA on February 12, 2018.

89. On February 14, 2018, Plaintiffs informed Sandoz that information Sandoz purportedly relied on in its Notice Letter to support non-infringement assertions for the ’753 and

'455 Patents was not contained in Sandoz's ANDA. Plaintiffs requested that Sandoz produce the relied-upon information in order to fully evaluate Sandoz's claim of non-infringement. Sandoz refused to produce the requested information.

90. According to applicable regulations, Notice Letters such as Sandoz's must contain a detailed statement of the factual and legal basis for the applicant's opinion that the patent is invalid, unenforceable, or not infringed which includes a claim-by-claim analysis, describing "for each claim of a patent alleged not to be infringed, a full and detailed explanation of why the claim is not infringed" and "for each claim of a patent alleged to be invalid or unenforceable, a full and detailed explanation of the grounds supporting the allegation." *See* 21 CFR § 314.95(c)(7); *see also* 21 CFR § 314.52.

91. Sandoz's Notice Letter failed to allege that the claims of the '604 Patent are not infringed.

92. On information and belief, if FDA approves Sandoz's ANDA, Sandoz will manufacture, offer for sale, or sell its ANDA Product, within the United States, including within the State of Delaware, or will import its ANDA Product into the United States, including the State of Delaware. The manufacture, use, offer for sale, sale, or importation of Sandoz's ANDA Product will directly infringe the '753, '455, '617, '604, '140, '548, '231, and '232 Patents either literally or under the doctrine of equivalents, and Sandoz will actively induce and/or contribute to their infringement.

93. Plaintiffs initially brought this action within forty-five days of Plaintiffs' receipt of Sandoz's Notice Letter. Accordingly, Plaintiffs are entitled to a stay of FDA approval pursuant to 21 U.S.C. § 355(j)(5)(B)(iii) and U.S.C. § 355(j)(5)(F)(ii).

94. After Plaintiffs initially brought this action, the '140, and '548 Patents were listed in the Orange Book for IMBRUVICA[®]. Plaintiffs filed a First Amended Complaint to assert infringement of the '140 and '548 Patents in addition to the patents originally asserted against Sandoz. 18-192, D.I. 83.

95. After Plaintiffs initially brought this action, the '231 and '232 Patents were listed in the Orange Book for IMBRUVICA[®]. Pursuant to 21 CFR § 314.94(a)(12)(viii)(C)(1)(ii), Sandoz must submit a certification for the '231 and '232 Patents in connection with ANDA No. 211267 before obtaining FDA approval of the ANDA. On information and belief, Sandoz has not submitted a Paragraph III certification for the '231 and '232 Patents. Sandoz has submitted a Paragraph IV certification in connection with ANDA No. 211267 for patents related to the '231 and '232 Patents. On information and belief, Sandoz intends to seek permission from FDA to market its ANDA Product prior to expiration of the '231 and '232 Patents. Plaintiffs bring this Second Amended Complaint to assert infringement of the '231 and '232 Patents in addition to the patents originally asserted against Sandoz.

96. On July 8, 2019, Plaintiffs requested Sandoz's consent to file this Second Amended Complaint with counts for infringement of the '231 and '232 Patents against Sandoz. On July 22, 2019, Sandoz provided consent to the filing of this Second Amended Complaint with counts of infringement of the '231 and '232 Patents against Sandoz.

97. This Second Amended Complaint is timely filed prior to the August 16, 2019 deadline for amended pleadings as set forth in the Scheduling Order. C.A. No. 18-192, D.I. 85 at 1.

COUNT I
INFRINGEMENT OF THE '309 PATENT BY ZYDUS

98. Plaintiffs restate, reallege, and incorporate by reference paragraphs 1–97 as if fully set forth herein.

99. On information and belief, Zydus submitted or caused the submission of ANDA No. 211344 to FDA, and thereby seeks FDA approval of Zydus's ANDA Product.

100. Plaintiffs own all rights, title, and interest in and to the '309 Patent.

101. Zydus's ANDA Product infringes one or more claims of the '309 Patent.

102. Zydus did not contest infringement of at least claims 1–7, 10, and 14 of the '309 Patent in Zydus's First Notice Letter. If Zydus had a factual or legal basis to contest infringement of the claims of the '309 Patent, it was required by applicable regulations to state such a basis in its Notice Letter. *See* 21 CFR § 314.95(c)(7); 21 CFR § 314.52.

103. Zydus has infringed one or more claims of the '309 Patent under 35 U.S.C. § 271(e)(2)(A) by submitting ANDA No. 211344 with a Paragraph IV certification and thereby seeking FDA approval of a generic version of IMBRUVICA[®] prior to the expiration of the '309 Patent.

104. On information and belief, the importation, manufacture, sale, offer for sale, or use of Zydus's ANDA Product prior to the expiration of the '309 Patent would infringe one or more claims of the '309 Patent under 35 U.S.C. § 271(a), and/or Zydus would induce the infringement of and/or contribute to the infringement of one or more claims of the '309 Patent under 35 U.S.C. § 271 (b) and/or (c).

105. Zydus had actual and constructive notice of the '309 Patent prior to filing ANDA No. 211344, and was aware that the filing of ANDA No. 211344 with the request for FDA

approval prior to the expiration of the '309 Patent would constitute an act of infringement of the '309 Patent.

106. Zydus filed its ANDA without adequate justification for asserting that the '309 Patent is invalid, unenforceable, and/or not infringed by the commercial manufacture, use, offer for sale, or sale of its ANDA Product. Zydus's conduct in certifying invalidity with respect to the '309 Patent renders this case "exceptional" as that term is set forth in 35 U.S.C. § 285, and entitles Plaintiffs to recovery of their attorneys' fees and such other relief as this Court deems proper.

107. Plaintiffs will be irreparably harmed if Zydus is not enjoined from infringing, and from actively inducing or contributing to the infringement of the '309 Patent. Plaintiffs do not have an adequate remedy at law, and considering the balance of hardships between Plaintiffs and Zydus, a remedy in equity is warranted. Further, the public interest would not be disserved by the entry of a permanent injunction.

COUNT II
INFRINGEMENT OF THE '444 PATENT BY ZYDUS

108. Plaintiffs restate, reallege, and incorporate by reference paragraphs 1–107 as if fully set forth herein.

109. On information and belief, Zydus submitted or caused the submission of ANDA No. 211344 to FDA, and thereby seeks FDA approval of Zydus's ANDA Product.

110. Plaintiffs own all rights, title, and interest in and to the '444 Patent.

111. Zydus's ANDA Product infringes one or more claims of the '444 Patent.

112. Zydus did not contest infringement of claims 1–8 of the '444 Patent in Zydus's First Notice Letter. If Zydus had a factual or legal basis to contest infringement of the claims of

the '444 Patent, it was required by applicable regulations to state such a basis in its Notice Letter. *See* 21 CFR § 314.95(c)(7); 21 CFR § 314.52.

113. Zydus has infringed one or more claims of the '444 Patent under 35 U.S.C. § 271(e)(2)(A) by submitting ANDA No. 211344 with a Paragraph IV certification and thereby seeking FDA approval of a generic version of IMBRUVICA[®] prior to the expiration of the '444 Patent.

114. On information and belief, the importation, manufacture, sale, offer for sale, or use of Zydus's ANDA Product prior to the expiration of the '444 Patent would infringe one or more claims of the '444 Patent under 35 U.S.C. § 271(a), and/or Zydus would induce the infringement of and/or contribute to the infringement of one or more claims of the '444 Patent under 35 U.S.C. § 271 (b) and/or (c).

115. Zydus had actual and constructive notice of the '444 Patent prior to filing ANDA No. 211344, and was aware that the filing of ANDA No. 211344 with the request for FDA approval prior to the expiration of the '444 Patent would constitute an act of infringement of the '444 Patent.

116. Zydus filed its ANDA without adequate justification for asserting that the '444 Patent is invalid, unenforceable, and/or not infringed by the commercial manufacture, use, offer for sale, or sale of its ANDA Product. Zydus's conduct in certifying invalidity with respect to the '444 Patent renders this case "exceptional" as that term is set forth in 35 U.S.C. § 285, and entitles Plaintiffs to recovery of their attorneys' fees and such other relief as this Court deems proper.

117. Plaintiffs will be irreparably harmed if Zydus is not enjoined from infringing, and from actively inducing or contributing to the infringement of the '444 Patent. Plaintiffs do not

have an adequate remedy at law, and considering the balance of hardships between Plaintiffs and Zydus, a remedy in equity is warranted. Further, the public interest would not be disserved by the entry of a permanent injunction.

COUNT III
INFRINGEMENT OF THE '711 PATENT BY ZYDUS

118. Plaintiffs restate, reallege, and incorporate by reference paragraphs 1–117 as if fully set forth herein.

119. On information and belief, Zydus submitted or caused the submission of ANDA No. 211344 to FDA, and thereby seeks FDA approval of Zydus's ANDA Product.

120. Plaintiffs own all rights, title, and interest in and to the '711 Patent.

121. Zydus's ANDA Product infringes one or more claims of the '711 Patent.

122. Zydus did not contest infringement of claims 1–2 of the '711 Patent in Zydus's First Notice Letter. If Zydus had a factual or legal basis to contest infringement of the claims of the '711 Patent, it was required by applicable regulations to state such a basis in its Notice Letter. *See* 21 CFR § 314.95(c)(7); 21 CFR § 314.52.

123. Zydus has infringed one or more claims of the '711 Patent under 35 U.S.C. § 271(e)(2)(A) by submitting ANDA No. 211344 with a Paragraph IV certification and thereby seeking FDA approval of a generic version of IMBRUVICA[®] prior to the expiration of the '711 Patent.

124. On information and belief, the importation, manufacture, sale, offer for sale, or use of Zydus's ANDA Product prior to the expiration of the '711 Patent would infringe one or more claims of the '711 Patent under 35 U.S.C. § 271(a), and/or Zydus would induce the infringement of and/or contribute to the infringement of one or more claims of the '711 Patent under 35 U.S.C. § 271 (b) and/or (c).

125. Zydus had actual and constructive notice of the '711 Patent prior to filing ANDA No. 211344, and was aware that the filing of ANDA No. 211344 with the request for FDA approval prior to the expiration of the '711 Patent would constitute an act of infringement of the '711 Patent.

126. Zydus filed its ANDA without adequate justification for asserting that the '711 Patent is invalid, unenforceable, and/or not infringed by the commercial manufacture, use, offer for sale, or sale of its ANDA Product. Zydus's conduct in certifying invalidity and/or non-infringement with respect to the '711 Patent renders this case "exceptional" as that term is set forth in 35 U.S.C. § 285, and entitles Plaintiffs to recovery of their attorneys' fees and such other relief as this Court deems proper.

127. Plaintiffs will be irreparably harmed if Zydus is not enjoined from infringing, and from actively inducing or contributing to the infringement of the '711 Patent. Plaintiffs do not have an adequate remedy at law, and considering the balance of hardships between Plaintiffs and Zydus, a remedy in equity is warranted. Further, the public interest would not be disserved by the entry of a permanent injunction.

COUNT IV
INFRINGEMENT OF THE '403 PATENT BY ZYDUS

128. Plaintiffs restate, reallege, and incorporate by reference paragraphs 1–127 as if fully set forth herein.

129. On information and belief, Zydus submitted or caused the submission of ANDA No. 211344 to FDA, and thereby seeks FDA approval of Zydus's ANDA Product.

130. Plaintiffs own all rights, title, and interest in and to the '403 Patent.

131. Zydus's ANDA Product infringes one or more claims of the '403 Patent.

132. Zydus did not contest infringement of claims 1–13 of the '403 Patent in Zydus's First Notice Letter. If Zydus had a factual or legal basis to contest infringement of the claims of the '403 Patent, it was required by applicable regulations to state such a basis in its Notice Letter. *See* 21 CFR § 314.95(c)(7); 21 CFR § 314.52.

133. Zydus has infringed one or more claims of the '403 Patent under 35 U.S.C. § 271(e)(2)(A) by submitting ANDA No. 211344 with a Paragraph IV certification and thereby seeking FDA approval of a generic version of IMBRUVICA[®] prior to the expiration of the '403 Patent.

134. On information and belief, the importation, manufacture, sale, offer for sale, or use of Zydus's ANDA Product prior to the expiration of the '403 Patent would infringe one or more claims of the '403 Patent under 35 U.S.C. § 271(a), and/or Zydus would induce the infringement of and/or contribute to the infringement of one or more claims of the '403 Patent under 35 U.S.C. § 271 (b) and/or (c).

135. Zydus had actual and constructive notice of the '403 Patent prior to filing ANDA No. 211344, and was aware that the filing of ANDA No. 211344 with the request for FDA approval prior to the expiration of the '403 Patent would constitute an act of infringement of the '403 Patent.

136. Zydus filed its ANDA without adequate justification for asserting that the '403 Patent is invalid, unenforceable, and/or not infringed by the commercial manufacture, use, offer for sale, or sale of its ANDA Product. Zydus's conduct in certifying invalidity with respect to the '403 Patent renders this case "exceptional" as that term is set forth in 35 U.S.C. § 285, and entitles Plaintiffs to recovery of their attorneys' fees and such other relief as this Court deems proper.

137. Plaintiffs will be irreparably harmed if Zydus is not enjoined from infringing, and from actively inducing or contributing to the infringement of the '403 Patent. Plaintiffs do not have an adequate remedy at law, and considering the balance of hardships between Plaintiffs and Zydus, a remedy in equity is warranted. Further, the public interest would not be disserved by the entry of a permanent injunction.

COUNT V
INFRINGEMENT OF THE '079 PATENT BY ZYDUS

138. Plaintiffs restate, reallege, and incorporate by reference paragraphs 1–137 as if fully set forth herein.

139. On information and belief, Zydus submitted or caused the submission of ANDA No. 211344 to FDA, and thereby seeks FDA approval of Zydus's ANDA Product.

140. Plaintiffs own all rights, title, and interest in and to the '079 Patent.

141. Zydus's ANDA Product infringes one or more claims of the '079 Patent.

142. Zydus did not contest infringement of at least claims 1–7, 11, and 12 of the '079 Patent in Zydus's First Notice Letter. If Zydus had a factual or legal basis to contest infringement of the claims of the '079 Patent, it was required by applicable regulations to state such a basis in its Notice Letter. *See* 21 CFR § 314.95(c)(7); 21 CFR § 314.52.

143. Zydus has infringed one or more claims of the '079 Patent under 35 U.S.C. § 271(e)(2)(A) by submitting ANDA No. 211344 with a Paragraph IV certification and thereby seeking FDA approval of a generic version of IMBRUVICA[®] prior to the expiration of the '079 Patent.

144. On information and belief, the importation, manufacture, sale, offer for sale, or use of Zydus's ANDA Product prior to the expiration of the '079 Patent would infringe one or more claims of the '079 Patent under 35 U.S.C. § 271(a), and/or Zydus would induce the

infringement of and/or contribute to the infringement of one or more claims of the '079 Patent under 35 U.S.C. § 271 (b) and/or (c).

145. Zydus had actual and constructive notice of the '079 Patent prior to filing ANDA No. 211344, and was aware that the filing of ANDA No. 211344 with the request for FDA approval prior to the expiration of the '079 Patent would constitute an act of infringement of the '079 Patent.

146. Zydus filed its ANDA without adequate justification for asserting that the '079 Patent is invalid, unenforceable, and/or not infringed by the commercial manufacture, use, offer for sale, or sale of its ANDA Product. Zydus's conduct in certifying invalidity with respect to the '079 Patent renders this case "exceptional" as that term is set forth in 35 U.S.C. § 285, and entitles Plaintiffs to recovery of their attorneys' fees and such other relief as this Court deems proper.

Plaintiffs do not have an adequate remedy at law, and considering the balance of hardships between Plaintiffs and Zydus, a remedy in equity is warranted. Further, the public interest would not be disserved by the entry of a permanent injunction.

COUNT VI
INFRINGEMENT OF THE '257 PATENT BY ZYDUS

148. Plaintiffs restate, reallege, and incorporate by reference paragraphs 1–147 as if fully set forth herein.

151. Zydus's ANDA Product infringes one or more claims of the '257 Patent.

152. Zydus did not contest infringement of at least claims 1–10 and 13 of the '257 Patent in Zydus's First Notice Letter. If Zydus had a factual or legal basis to contest infringement of the claims of the '257 Patent, it was required by applicable regulations to state such a basis in its Notice Letter. *See* 21 CFR § 314.95(c)(7); 21 CFR § 314.52.

156. Zydus filed its ANDA without adequate justification for asserting that the '257 Patent is invalid, unenforceable, and/or not infringed by the commercial manufacture, use, offer for sale, or sale of its ANDA Product. Zydus's conduct in certifying invalidity with respect to the '257 Patent renders this case "exceptional" as that term is set forth in 35 U.S.C. § 285, and

entitles Plaintiffs to recovery of their attorneys' fees and such other relief as this Court deems proper.

157. Plaintiffs will be irreparably harmed if Zydus is not enjoined from infringing, and from actively inducing or contributing to the infringement of the '257 Patent. Plaintiffs do not have an adequate remedy at law, and considering the balance of hardships between Plaintiffs and Zydus, a remedy in equity is warranted. Further, the public interest would not be disserved by the entry of a permanent injunction.

COUNT VII
INFRINGEMENT OF THE '091 PATENT BY ZYDUS

158. Plaintiffs restate, reallege, and incorporate by reference paragraphs 1–157 as if fully set forth herein.

261. Plaintiffs will be irreparably harmed if Sandoz is not enjoined from infringing, and from actively inducing or contributing to the infringement of the '753 Patent. Plaintiffs do not have an adequate remedy at law, and considering the balance of hardships between Plaintiffs and Sandoz, a remedy in equity is warranted. Further, the public interest would not be disserved by the entry of a permanent injunction.
